

Toyota Forklift Parts

Toyota Forklift Parts - Since 1992, Toyota Material Handling inc., U.S.A., also known as TMHU, continues to be the top selling lift truck supplier in the United States. This business has been situated out of Irvine, California for well over 40 years, offering a complete line of quality lift trucks. With a remarkable reputation of resilience and reliability, Toyota lift trucks have thrived in the competitive resources handling market. Quality is the keystone of Toyota's renowned Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, situated in Columbus, Indiana. The majority of the Toyota lift trucks sold in the U.S.A are manufactured here.

All Toyota's manufacturing facilities within Canada and the United States comply with the International Organization for Standardization or ISO 14001 standard. TIEM has been honored many times for its dedication to continuous development, and its environmental systems. It is the first and only manufacturer to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. To illustrate, the Toyota 8-Series IC lift trucks emit 70% less smog forming emissions than the current centralized EPA standards and have complied with California's strict emission standards and regulations.

Toyota Material Handling, U.S.A. - The Industry Leader

The president of Toyota Material Handling, U.S.A., Brett Wood feels that TMHU's achievement comes from its dedication to construct high quality lift vehicles at the same time as offering exceptional customer support and service. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues." TMHU's parent company, Toyota Industries Corporation, also referred to as TICO, is listed in Fortune Magazine as the world's largest lift truck supplier and is amongst the magazines impressive World's Most Admired Companies.

Redefining Environmental Responsibility

Toyota's parent company, Toyota Industries Corporation, has imparted an outstanding company principles towards environmental stewardship within Toyota. Toyota's rich history of environmental protection whilst retaining economic viability cannot be matched by other organizations and unquestionably no other resource handling manufacturer can thus far rival Toyota. Environmental responsibility is an important aspect of corporate decision making at Toyota and they are proud to be the first and only maker to offer UL-listed, EPA - and CARB -certified Compressed Natural Gas powered lift vehicles. Yet one more reason they remain a leader within the industry.

In 2006, Toyota introduced the 8-Series line. The 8-Series signifies both Toyota's innovation and leadership in the industry. It features an exclusive emission system that surpasses Federal EPA emission standards, and also meets California's more elaborate 2010 emission standards. The end product is a lift vehicle that creates 70% fewer smog forming emissions than the existing Federal standards allow.

Moreover in 2006, Toyota developed an affiliation with the Arbor Day Foundation, furthering their responsibility to the environment. More than 57,000 trees have been planted in regional parks and national forests damaged by environmental causes such as fires, as a product of this relationship. 10,500 seedlings have also been distributed through Toyota Industrial Equipment's network of sellers to non-profit organizations and local customers to help sustain communities all over the United States

Toyota's lift vehicles offer superior durability, visibility, efficiency, ergonomics, and all the foremost safety technology that has made Toyota an industry leader. The company's System of Active Stability, also referred to as "SAS", helps reduce the chance of incidents and injuries, and increasing productivity levels while minimizing the likelihood of product and equipment breakage.

System Active Stability can perceive factors that may lead to lateral instability and likely lateral overturn. When any of these conditions have been sensed, the SAS will immediately engage the Swing Lock Cylinder to re-stabilize the rear axle. This alters the lift truck's stability footprint from triangular in shape to rectangular, providing a major increase in stability which substantially reduces the likelihood of a mishap from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also aids to prevent injuries or accidents while adding durability.

The SAS systems were initially adopted on the 7-Series internal combustion lift vehicles which were put on the market in 1999. These systems helped thrust Toyota into the lead for industry safety standards. Now, SAS is used on practically every new internal combustion products and is standard equipment for the new 8-Series. There are more than 100,000 SAS-equipped lift trucks in operation, exceeding 450 million hours combined. The increased population of SAS-equipped trucks in the field, along with obligatory worker training, overturn fatalities across all designs have decreased by 13.6% since 1999. Also, there has been an overall 35.5% drop in industry wide collisions, loss of control, falls and tip overs from a lift truck for the same period.

Toyota's hardnosed principles extend far beyond the technology itself. The company believes in providing extensive Operator Safety Training courses to help users meet and exceed OSHA standard 1910.178. Education courses, video lessons and a variety of materials, covering a wide scope of matters-from individual safety, to OSHA policies, to surface and cargo conditions, are available through the dealer network.

Since the transaction of its first lift vehicle in the U.S. to the fabrication of its 350,000th lift truck produced in 2009 at Toyota Industrial Equipment Manufacturing, TMHU has maintained a unbroken presence in the U.S. This reality is demonstrated by the statistic that 99% of Toyota lift trucks sold in America at the moment are built in the United States.

Based in Columbus, Ind., the Toyota Industrial Equipment Mfg. campus equals 998,000 square feet of facilities spanning 126 acres.

Facilities include a National Customer Center, as well as production operations and distribution centers for equipment and service parts, with the total commitment exceeding \$113 million dollars.

The new NCC was designed to operate for TMHU buyers and sellers. The facility includes a 360-degree showroom, a presentation theater complete with stadium seating for 32, an section for live merchandise demonstrations with seating capacity for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's story since the birth of its founder, Sakichi Toyoda, in 1867, and lastly a instruction center.

TMHU has 68 authorized industrial equipment dealers, along with 189 dealership locations throughout the United States, offering the most complete and inclusive client support and customer service in the industry. The company's new and Licensed Used lift vehicles, service, parts, and financing capabilities make Toyota dealerships a one-stop shop to guarantee total customer satisfaction.
