

Meritor Parts

Meritor Part - The Meritor Business is a leading international dealer built upon one hundred years of custom of quality and service. Meritor focuses on integrated systems together with a range of modules and components to the original equipment makers and aftermarket equipment within the industrial and transportation sectors.

Meritor values the needs of their customers to ensure their success while priding itself in the company's unique energy and believes this output of energy to be their aggressive advantage in their global operations. Meritor starts with a tradition that values diversity of people and their broad thought processes. Operating in 19 countries and hiring over 11,200 individuals, Meritor encourages collaboration and innovation amongst a team of experienced professionals.

By only hiring future focused staff, Meritor strongly feels these top-caliber people will be able to quickly adapt to changing environments and demonstrate the performance and commitment needed so as to reach results in the competitive materials handling business. The business empowers their teams to make sound business decisions to be able to improve the overall success of the company. In return, Meritor offers their staff different opportunities for personal and professional development.

The Advanced Engineering team is on the forefront of components and system engineering. This consists of axles, drivelines, suspension and braking systems for heavy duty and medium trucks, off-highway vehicles, buses, military vehicles and trailers. The Meritor Advanced Engineering team is growing. They opened a new technical center in Bangalore, India in September 2009 so as to lead their advanced product development initiatives which represent the entire Asia Pacific region. This particular team is even responsible for supporting the requirements of their global engineering employees.

The Quality team at Meritor is a customer-focused and dynamic group which is dedicated to ensuring optimum progress at their production plants and aftermarket distribution facilities which are located on 5 continents and in 19 nations.

The supplier development network is particularly located in order to support new business development. Regional teams are supported by global initiatives, quality systems and centralized specialties in Materials Engineering and Six Sigma. Meritor's growing Six Sigma program promotes a data-driven, fact-based approach to decision making in each and every aspect of the company. The DFSS or also known as Design for Six Sigma ensures product reliability within each region. The team is also comprised of transactional Green Belts who apply Six Sigma tools to business techniques and apply lean techniques.
