

## Remanufactured Forklift Parts

Remanufactured Lift Truck Parts - Lift trucks are really expensive pieces of machines. A 5000lb new electric unit could cost between eighteen thousand to twenty five thousand and several thousands of dollars more would be needed for a battery and a battery charger. The same internal combustion forklift of similar lift capacity will cost a little less and the diesel models that are capable of heavier lifting capacities can cost upwards of \$100,000. Reconditioned forklifts are an alternative to save much cash since they cost less than half the price of new models.

Some purchasers may be skeptical about acquiring a used or reconditioned forklift as they feel they will have to spend more on maintenance. Then again, a properly reconditioned lift truck would be able to work just as well as a new one. Although your lift will get heavy use, so long as you take proper care of the machine, it will serve all your needs and possibly save you lots of cash.

When thinking about purchasing a used forklift, it is important to ascertain what the seller means by the term reconditioned or refurbished. Many companies do an excellent job of entirely making over the unit previous to reselling it. This consists of disassembling the lift truck, rebuilding the engine, sandblasting the lift and afterward reassembling everything and finishing with a fresh coat of paint.

To correctly and thoroughly reconstruct a lift truck engine, a good company will completely disassemble it. A heat cleaning system can then be utilized to clean all the components. As soon as this step has been done, all of the components are checked to see if they have any extensive wear, any defects or breakage. Specific components like for example cylinder blocks, connecting blocks, cylinder heads and crankshafts are reground, resurfaced and resized if needed. Various parts like for instance nuts, bolts, gears and that. are repaired or replaced as needed.

When the overhaul has been done, the engine is rebuilt by hand. After being put back together, a series of tests are applied to the working machinery so as to check all of the components and be positive there are no leaks or issues. If any problems occur, the necessary adjustments are done.

There is no reason to be apprehensive about purchasing reconditioned lift trucks from quality sellers. The process the machines go through to be rebuilt ensures the utmost dependability. Repairs costs could truly work out to be less since you will avoid the initial phase of higher maintenance projections that a brand new forklift has as it is broken in. By following routine upkeep schedules and taking care of the equipment properly, a reconditioned lift truck will serve you well.
