

Clark Forklift Part

Clark Forklift Parts - Performing globally, there are at this time 350,000 Clark forklifts and lift vehicles in operation, with upwards of 250,000 of those in use in North America. Clark has five main lines of lift trucks across the world, making it one of the most expansive companies in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, gasoline, LPG, hand powered lift trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift has 20 distinctive makes of lift trucks, with parts covering more than 120,000 specific components for all of its automated equipment. Your local Clark Seller is your complete source for availability of all your components requirements offered by Clark Totalift.

Clark's phenomenal Parts Distribution Stores are conveniently situated in Louisville, Kentucky, which serves both their clients and dealers in North America, and Changwon, South Korea, which handles their Asian dealers and consumers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing companies. Driven to offer the highest level of value and service to our users, Clark remains on the leading edge when it comes to enhancing output and benefiting performance.

Globally, Clark has one of the most impressive dealer support networks. With over 550 locations globally, dealer representation in over 80 countries and 230 locations in North America, their high level of dedication to their consumers predominates the material handling market.

By revolutionizing the operator restraint system protection feature, Clark proudly remains a leader of refinement in the industrial equipment and automated lift truck industry. This exceptional dedication to safety is now a standard feature on every forklift.

Clark has a unrelenting mission to have the No. 1 quality system in the industry which is demonstrated by their commitment to ISO standards. Clark, is the first manufacturer of forklifts and lift vehicles to be internationally certified with quality standard ISO 9001 in all of its production facilities. Furthermore, the ISO 14001 Environmental Stewardship System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be ready for any number of environmental restrictions, thus placing them in a dominant industry position.

Clark has chosen the system of "Lean Production" at all of its assembly facilities because this method is extremely economical and permits minimal use of resources. Developed to ensure maximum efficiency, this system is designed to find and acknowledge the most effective methods for production facility stewardship. Clark has completed this transition of its Korean facility. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and production efficiencies.

By working together, Clark's product suppliers and engineers communicate towards enhancing product effectiveness while minimizing expenses. The contemporary value engineering agenda combines progressive product growth and delivers superior consumer support and service within the industry.
